CUISA 2015 Conference & Trade Show

Conference Update

The planning for this year's Conference and Trade show is in full swing. The email invitations were sent out to all our members and the responses have starting coming in. If you haven't already booked your hotel room, make sure to call the River Rock now and tell them you are with CUISA.

This year we kick off the conference with a whale watching tour. Tickets are limited so sign up today! The BC Children's Hospital Foundation will also be joining us for this year's Silent Auction.

The theme is the "Art of Influence" and we have a great line up of speakers and seminars, as well as this year's keynote speaker: Art Hister.

ICBC will be joining us with a very important update on their new point of sale system for brokers which is one of the many hot topics that will be discussed.

As in year's past, we will then have our Gala Banquet dinner, followed by some great entertainment.

Of course, the final day is when we have our Annual General Meeting.

Trade Show

This year the Trade Show will be held on Thursday June 4th from 1pm—5pm. This is a great opportunity to meet new companies and see new products . We also have Right Touch chair massages available, so be sure to sign up at the Conference. There will be prizes given away throughout the show and one lucky winner will walk away with the grand prize, a \$1000 trip voucher. You must be present to win, so don't miss out.!

A Message from your Executive Director

Just a reminder regarding our Job Board. Please encourage your human resources department to use it. It's free and it supports the Association.

Please review our membership directory and forward any changes necessary to the Association to ensure that your information is current and correct.

Check out our website! We are continually making changes and would love to hear what you think!

Welcome to our new Corporate Partner Damage Control Pro

New leak-detection system only product of its kind in Canada!

Kyle Sigouin

It's a product that can reduce costs to homeowners and insurance companies by helping prevent excessive water leakage and water damage.

AquaTrip automatically and continuously detects water leaks, providing real-time information and control of the water supply in your home. All the water that enters the home runs through this device.

If a leak is detected, the system will shut off water at the main supply, preventing damage or water waste. It can tell the difference between normal use and a leak. It's particularly useful if homeowners are absent.

Damage Control Pro offers three options of protection. The basic unit, the wireless, remote-controlled unit, or a hard-wired device. For each system purchased, DCPro-certified plumbers are available across Canada to install these devices.

Those plumbers have a minimum quantity of AquaTrip units in their vehicles at all times to provide homeowners the opportunity to acquire the product.

Damage Control Pro is committed to making a difference in the insurance industry by providing the only full-service leak detection product in Canada. To learn more, visit www.dcpo.ca
